## DETAILED ACTION

### *Priority*

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

### *Specification*

2. The disclosure is objected to because of the following informalities: in paragraph 0023 line 10 and paragraph 0032 line 9 applicants should clarify that the elastic ring having a higher rigidity has a *lower* (not "higher") elasticity than the other elastic ring.

Appropriate correction is required.

### *Claim Objections*

3. Claims 2 and 7 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The intended positioning of the run-flat support member with respect to a vehicle does not further limit the structure of the run-flat support member because the vehicle is not required to be present in the claim and no other structural feature is claimed which would distinguish the "outer" side of the run-flat support member from the "inner" side thereof.

One way to overcome this objection with respect to claim 2 would be to rewrite claim 2 in independent form such that the vehicle is positively recited in the claims (A vehicle including a tire/wheel assembly in which ... ).

### *Claim Rejections - 35 USC § 112*

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Art Unit: 1733

5. Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Applicants have not yet defined the claimed "rigidity" as the radial rigidity described in paragraph 0033 of the specification; for purposes of this examination the claimed "rigidity" will be interpreted as being the radial rigidity described in paragraph 0033 of the specification, however correction is required.

*Claim Rejections - 35 USC § 102*

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by PCT Publication WO 99/64260 A1 (equivalent to Hellweg et al. (6,463,974 B1)).

See Hellweg et al. col. 2 lines 24-50, col. 4 lines 47-64, col. 7 line 47 - col. 8 line 16, embodiment of Figure 1. As to the recitation in claims 1 and 6 that "the elastic ring receiving a larger load during run-flat traveling has a higher rigidity" as well as the language of claims 2 and 7, see paragraph 3 above explaining the failure of such language to further limit the claimed structure.

*Allowable Subject Matter*

8. Claims 4, 5, 9, and 10 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 1733

9. Claim 2 amended as suggested in paragraph 3 above would receive favorable consideration, since the prior art of record fails to disclose or suggest placing the higher rigidity elastic ring on the outer side of the vehicle in the claimed environment.

*Conclusion*

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Glinz et al. (6,463,976 B1) anticipates or renders obvious at least claims 1 and 6 (see the embodiment of Figure 4) but is considered to be no more pertinent to the instant claims than the prior art applied by the examiner above.
